

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claims 1-8. (Canceled)

9. (Currently Amended) A resin coated steel sheet comprising a galvanized alloy steel sheet and an organic resin layer formed on at least one surface of said galvanized steel sheet;

wherein a galvanized alloy plating is formed on at least one surface of a steel sheet ~~and wherein the steel sheet having the galvanized alloy thereon is treated with an anodic treatment anodically in acid solution, wherein the composition of the acid solution is the same as a bath composition of the a galvanized alloy plating bath contains ions such that~~ wherein hydrate oxides selected from the group consisting of Zn, Co, Ni and Mo are formed on the ~~galvanized alloy steel sheet to form a galvanized alloy steel sheet,~~ wherein the at least one surface of the galvanized alloy steel sheet is blackened to have an L-value equal to or less than 30.

10. (Currently Amended) A resin coated steel sheet comprising a galvanized alloy steel sheet and an organic resin layer formed on at least one surface of the galvanized alloy steel sheet, wherein a galvanized alloy plating is formed on at least one surface of a steel sheet and the sheet having the galvanized alloy thereon is treated ~~by an anodic treatment~~anodically in ~~acid~~ solution, wherein the composition of the ~~acid~~ solution is ~~the same as the composition of the~~a galvanized alloy plating bath wherein the plating bath contains ions such that hydrate oxides selected from the group consisting of Zn, Co, Ni and Mo are formed on the steel sheet to form a galvanized alloy steel sheet, wherein the at least one surface of the galvanized alloy steel sheet is blackened to have an L-value equal to or less than 30, and said organic resin layer includes at least one of colloidal silica and an agent providing a lubricant function at a surface of the organic resin layer.

11. (Previously Presented) The resin coated steel sheet according to claim 9 wherein the resin is selected from the group consisting of urethane resins, polyester resins, acrylic resins, and olefin resins.

12. (Previously Presented) The resin coated steel sheet according to claim 10 wherein the resin is selected from

the group consisting of urethane resins, polyester resins, acrylic resins, and olefin resins.

13. (Previously Presented) The resin coated steel sheet according to claim 9 wherein the resin is a urethane resin having a pencil hardness of individual resin of H to 6H, a tensile strength of 300 to 500 kg/cm² and an extension ratio of 250 to 450%.

14. (Previously Presented) The resin coated steel sheet according to claim 10 wherein the resin is a urethane resin having a pencil hardness of individual resin of H to 6H, a tensile strength of 300 to 500 kg/cm² and an extension ratio of 250 to 450%.

15. (Previously Presented) The resin coated steel sheet according to claim 10 wherein the organic resin layer includes colloidal silica of equal to or less than 50 wt%, polytetrafluoroethylene, and optionally 20 wt% or less of at least one of polytetrafluoroethylene or polyethylene wax.

16. (Previously Presented) The resin coated steel sheet according to claim 9 wherein the organic resin layer includes at least one member of the group consisting of 0.01 to 3 wt% anti-rust agent, 0.05 to 1 wt% silane coupling agent, and 0.1 to 3.0 wt% black pigment.

17. (Previously Presented) The resin coated steel sheet according to claim 10 wherein the organic resin layer includes at least one member of the group consisting of 0.01 to 3 wt% anti-rust agent, 0.05 to 1 wt% silane coupling agent, and 0.1 to 3.0 wt% black pigment.

18. (Previously Presented) A patrone cap made of a resin coated steel sheet according to claim 9.

19. (Previously Presented) A patrone cap made of a resin coated steel sheet according to claim 10.

20. (Previously Presented) A patrone body made of a resin coated steel sheet according to claim 9.

21. (Previously Presented) A patrone body made of a resin coated steel sheet according to claim 10.

Claim 22 - 23. (Canceled)

24. (New) The resin coated steel sheet according to claim 9 wherein the galvanized alloy plating is not subsequently treated with chromate.

25. (New) The resin coated steel sheet according to claim 10 wherein the galvanized alloy plating is not subsequently treated with chromate.
